

ABOUT

In the modern world we live in, "time" undoubtedly has become the most precious source. Thanks to the innovative spirit of the Ekart R&D team, we strive to increase the quality of your living areas. Due to our new technology, we aim to give back the time you deserve.

Ekart Cleantech is a new technology that allows you to remove stains in a very simple way in the comfort of your house. With this convenient solution, you'll enjoy your sofa and use it for many years comfortably.

Thanks to Ekart Cleantech, you don't need to be over protective of your sofas. When they get stained, Cleantech fabrics would easily be cleaned and get back to its original form.

WHAT ARE THESE STAINS?

Pen

Coffee

Marker

Beer

Ketchup

Wine

Tea

Sausages etc.

TO CLEAN

HOW TO CLEAN THIS STAINS UP?

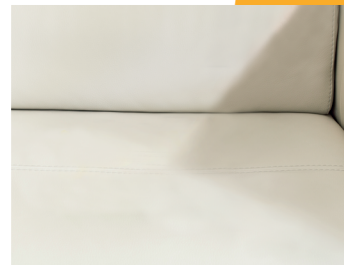

Whether it's ketchup, coffee or pen, water is the only thing that you will need to clean your smart fabrics without the help of professional cleaners or specific chemicals. For even the most stubborn stains a little bit of soap will do the trick.

WHAT ABOUT THE DURABILITY?

Ekart Cleantech is a permanent technology which remains active on the fabric even after washing and heavy use. The cleaned part of your sofa might get another stain. Chill out, you can always easily clean the same area again. Washing or dry-cleaning doesn't have any negative effect on Ekart Cleantech.

SUSTAINABILITY

Most of the time while cleaning even a small stain on the fabrics, we use a lot water which is the most scarce natural resource in our planet. With the effortless cleaning provided by our new technology, a serious amount of water consumption could be saved while maintaining your sofas. In addition to that, since no chemical detergents are needed, you would also prevent such chemicals from polluting our nature.

Sustainability is a main issue for Ekart and with our new environmentally friendly technology, we take a huge step in our aim of protecting our valuable resources. With preferring Cleantech you will also help us to reach our goal.
